

Waffer

Save Energy for the future

Waffer - is an application project aims to be of an assistance to sustainable living by ensuring that electricity power is not left unused. We are creating a code that simply remind people to turn off the light. In which that will help it preserve it.

Waffer application work in **two** ways.

- Two motion sensors will calculate the distance and caculcalte the elcetcity used then pay the bill if the person passing is an adult
- When used by children, as soon as a child walks it shows a message on an iPad with the message "Would you like to turn off the light? ".
